

Motor adaptations

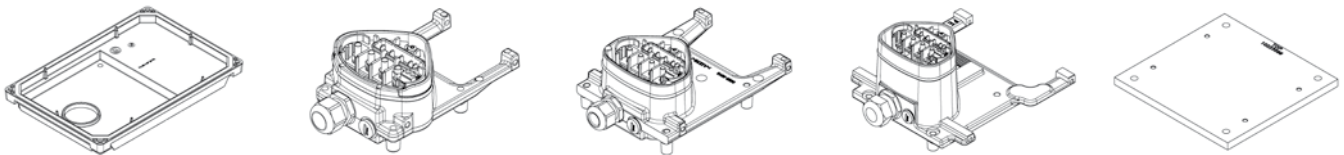

Thanks to the innovative adapter plate concept, the INVEOR drive controller is compatible with virtually all motors. With the standard adapter plates without holes, customers can flexibly produce hole patterns to suit their needs themselves. There are also pre-drilled adapter plates for many motor models. Wall mounting plates are available for mounting close to the motor.

Standard adapter plates (ADP)

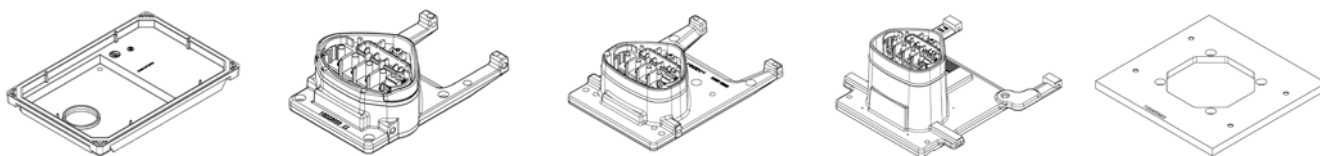

Motor size											
63	71	80	90	100	112	132	160	180	INVEOR size	Hole pattern	Item number
dependent on motor									α	freely selectable*	10117052
									A INVEOR M	freely selectable*	10108906
									A INVEOR MP / MP Modular	freely selectable*	10506789
									B	freely selectable*	10026184
									C	freely selectable*	10025632
									D	freely selectable*	10098202
									D HD model	freely selectable*	10145362

* The hole pattern is produced by the customer and should therefore be flexibly adapted to the motor
