Data sheet

INVEOR MP

KOSTAL INVERTERapp – the simple way of operation.

The KOSTAL INVERTER app can be used to very simply access all KOSTAL variable frequency drives in the INVEOR family with Bluetooth via your smartphone or tablet.

QUICK

The integrated assistant enables even first-time users to quickly commission and set the parameters of the variable frequency drive even without the manual.

CONVENIENT

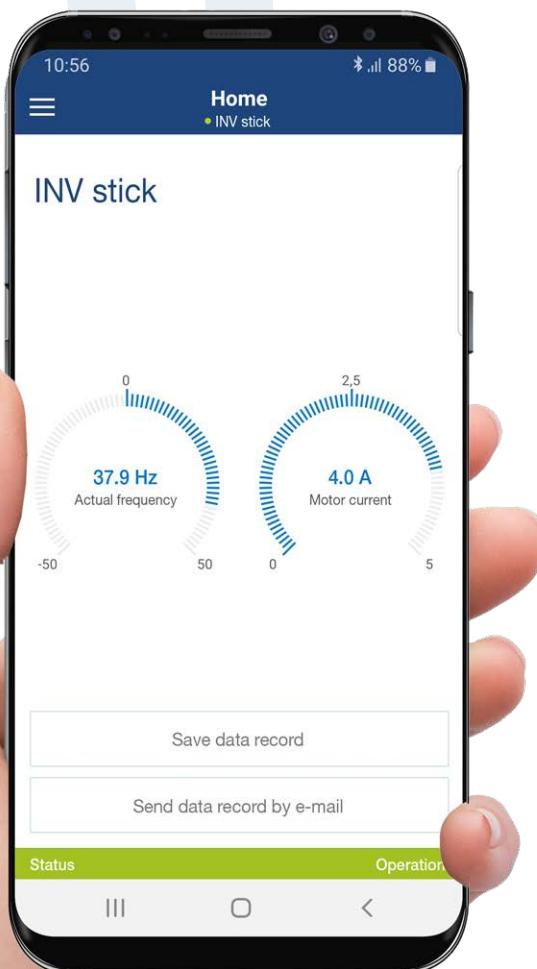

In hard-to-reach places, the variable frequency drive can be operated and monitored using the app and Bluetooth.

All operating data and device utilisation are available in the KOSTAL INVERTER app.

SIMPLE

Simple transfer of data records to other devices (clones).

Easy analysis and remote diagnosis: in addition to parameters, all other operating data and the error history are stored and can be e-mailed directly from the app.

+ App features

Assistant-guided commissioning

Variable frequency drive clones

Send data records by e-mail

Parameter settings in plain text

Control mode, control the variable frequency drive via your mobile end device

Access to all process parameters and device information

Error analysis, error history with additional data

Demo mode

Data records compatible with KOSTAL INVERTERpc software

Multi-lingual (9 languages)

400 V devices, technical data for INVEOR MP

Size	A					B				C			D													
Recommended motor rating ¹⁾ [kW]	0.55	0.75	1.1	1.5	2.2 LD ⁵⁾	2.2	3	4	5.5 LD ⁵⁾	5.5	7.5	11 LD ⁵⁾	11	15	18.5	22	30 LD ⁵⁾									
Supply voltage	3x200 V AC -10 %...480 V AC +10 % 280 V DC -10 %...680 V DC +10 % ²⁾																									
Grid frequency	50/60 Hz ± 6%																									
Network configurations	TN / TT																									
Electrical data	Line current [A]	1.4	1.9	2.6	3.3	3.9	4.6	6.2	7.9	9.3	10.8	13.8	18.3	23.2	28.2	33.2	38.2	49.8								
	Rated current output eff. [IN at 4 kHz]	1.7	2.3	3.1	4	4.8	5.6	7.5	9.5	11	13	16.5	22	28	34	40	46	60								
	Min. brake resistance [Ω]	100					50					30														
	Overload for 60 sec. [%]	150				110	150				110	150	110	150				110

	Switching frequency	Automatic regardless of temperature, 2 kHz, 4 kHz, 6 kHz, 8 kHz, 12 kHz, 16 kHz (factory setting 4 kHz)																								
	Output frequency	0 Hz – 599 Hz																								
	Nominal output apparent power [kVA]	1.06	1.43	1.93	2.49	2.99	3.49	4.68	5.92	6.86	8.11	10.29	13.72	17.46	21.2	24.94	28.68	37.41								
	Mains cycles of operation / restart	Unlimited ³⁾															> 2 min.									
Functions	DIN EN 61800-9-2 touch current	< 3.5 mA ⁴⁾																								
	Protective function	Overvoltage and undervoltage, I ² t restriction, short-circuit, ground leak, motor and variable frequency drive temperature, stall prevention, blocking detection, PID dry run protection, functional safety (SIL 3/PLe)																								
	Software functions	Torque control ⁶⁾ , multiple pumps, process control (PID controller), fixed frequencies, data record changeover, flying restart, motor current limit																								
	Soft PLC	IEC61131-3, FBD, ST, AWL																								
Mechanical data	Housing	Two-part aluminium die-cast casing																								
	Dimensions [L x W x H] mm	233 x 153 x 120				270 x 189 x 140				307 x 223 x 181				414 x 294 x 232												
	Weight including adapter plate [kg]	3.9				5.0				8.7				21.0												
	Protection class [IPxy]	IP 65															IP 55									
	Cooling	Passive Cooling															Active Cooling									
Environmental conditions	Climate class (DIN EN 60721-3-3)	3K3 (50°C)			3K3 (40°C)	3K3 (50°C)			3K3 (40°C)	3K3 (50°C)			3K3 (40°C)			3K3 (50°C)										
	Ambient temperature	-40 °C (non condensing) to +50 °C (without derating)				up to +40°C	-40 °C (non condensing) to +50 °C (without derating)				up to +40°C	-40 °C to +50 °C >50 °C (with derating)	to +40°C	-40 °C to +50 °C >50 °C (with derating)				to +40°C								
	Storage temperature	-40 °C...+85 °C																								
	Altitude of the installation location	Up to 1000 m above sea level / over 1000 m with reduced performance (1 % per 100 m) / above 2000 m see operating manual																								
	Relative air humidity	≤ 96 %, condensation not permitted.																								
	Vibration class (DIN EN 60721-3-3) ⁷⁾	3M7 (3g)																								
	EMC (DIN-EN-61800-3)	C2																								
	Energy efficiency class (EN 61800-9-2)	IE2																								
	Certificates and conformity	  																								

Application circuit board model	Basic	Standard	Functional safety
Available for size	A - B	A - D	
I/O interfaces	2 DI / 1 DO / 1 AI / - AO / relay	4 DI / 2 DO / 2 AI / 1 AO / 2 relays	4 DI / 2 DO / 2 AI / 1 AO / relay / 2 STO channels
Potentiometer on device	Option	Option	Option
Foil keypad	Option	Option (only size A-B)	Option (only size A-B)
MMI option	Option	Option	Option
Bluetooth	Option	Option	Option
Internal power supply	24 V DC, 100 mA / 10 V DC, 30 mA / short-circuit proof		
External feed-in 24 V DC	–	24 V DC +/-15 %	24 V DC +/-15 %
Fieldbus integrated	Modbus RTU		
Fieldbus option	–	CANopen / PROFIBUS / PROFINET / EtherCAT / Sercos III / Ethernet IP	

Technical data for 400 V devices INVEOR MP (subject to technical changes)

¹⁾ Recommended motor rating (4-pole asynchr. motor) is given based on the 400 V AC supply voltage.

²⁾ In compliance with the overvoltage category.

³⁾ < 3 s may result in power failure/intermediate circuit undervoltage faults.

⁴⁾ With 1LA7 asynchronous motor, motor-mounted.

⁵⁾ Low-duty devices with reduced output currents.

⁶⁾ Only for synchronous and reluctance motors.

⁷⁾ Installation- and application-related resonant frequencies can damage the devices.

INVEOR – "Smart connections." on five levels

1 The INVEOR

IP65 protection class

Integrated soft PLC

Multiple-pump function

Pre-fitted cable glands

Design without a fan up to 11 kW

Cover level and internal space
for e.g. the customer to mount a switch

Grid connection can be plugged in
(Harting plug HAN Q4/2, Quickon)

Optional slot

Brake module

Robust and vibration-resistant
housing concept

STO functional safety

Internal PTC brake resistor

3 Operation and observation

Potentiometer

M12 RS485 service interface

Main switch

Integrated foil keypad

MMI handheld controller

MMI cover option

Touch operating terminal

PC software: KOSTAL INVERTERpc

App: KOSTAL INVERTERapp

2 Communication

CANopen

**PROFI[®]
BUS**

EtherNet/IP

EtherCAT[®]

**PROFI[®]
NET**

MQTT

MODBUS RTU

SERCOS
the automation bus

Bluetooth[®]

4 Motor adaptations

Robust and vibration-resistant adapter
concept

Motor adapter concept compatible with
all commercially available motors

Mechanics of motor adapter compatible
with INVEOR M product group

5 Control process

Supports all synchronous reluctance,
synchronous and asynchronous motors
with maximum energy efficiency

INVEOR variable frequency drives meet the most stringent of energy efficiency requirements.

Variable frequency drive losses in accordance with EN 61800-9-2

Device	Supply voltage [V]	Nominal current [A]	Absolute power loss [W] ¹⁾²⁾									Standby losses [W]	IE-Class
