

A background image of an industrial factory floor with a long line of blue and grey machinery, possibly a conveyor belt system, receding into the distance. The lighting is bright and even.

**KOSTALize**

your application

★★★★  
**WARRANTY**

**4** YEARS

## WarrantyPlus

Extended warranty protection  
for your devices

Invest in additional protection now.

### **Four-year warranty instead of two**

Beyond the standard warranty period, you receive a comprehensive device warranty for a full four years from day one, which also includes additional benefits for you.

### **Reduced analysis time**

You will receive an analysis of the faulty device and feedback on the cause within 10 days instead of 20.

### **Discount on service costs**

If there is no warranty claim (customer fault / no fault detectable), you will receive up to a 25% discount on the service price list.

### **Removal of signs of usage**

In recognized warranty cases, we will remove external signs of usage within the first two years of delivery by, for example, replacing the lid so that the repaired device looks like new again. In years three and four after delivery, we will no longer repair the old inverter, but will credit you with 60% of the original purchase price as a loyalty bonus when you purchase a new inverter.

### **Selectively usable, individually selectable**

The extended warranty option can be individually configured for each device when ordering.

Our Terms of Service and Extended Warranty apply.
